Accreditation

Your NORCAT transcript, which includes Surface Miner Program #770210 Common Core, MLITSD Working at Heights, and Red Cross Standard and Psychological First Aid, will be an industry recognized credential ensuring employers that you possess the skills and safety knowledge needed to begin a career using heavy equipment for surface mining, construction or forestry. It rests on core actions that encompass our accreditation: respect, prevent, and protect.

MLITSD Specialty Module Accreditation

Successful graduates that pass both the knowledge and practical training and evaluations for the specialty modules will have the credentials needed to complete full specialty module accreditation from the MLITSD.

How do we do this?

By providing participants, the challenge necessary to become extraordinary operator professionals – professionals who are respectful and understand their responsibility to safety and their roles within the workplace and environment.

Defensive Driving:

This 5 day module is a theory-based driver education and refresher program focused on mine ready defensive driving and G1 licensing theory with the opportunity to challenge the G1 test at a drivers examination centre.
